

Polispot

Polimer plates for in-line varnishing, for spot or flood coating

Description:

Translucent green polymer varnishing plate (coating blanket) manufactured on a polyester film base; it is manufactured using a unique multilayer technology on a polyester film base up to 0.066" Green polymer varnishing plate (coating blanket) on a polyester film base coupled with nonwoven; it is manufactured using a unique multilayer technology.

Application:

- For in-line spot or flood varnishing (coating) in offset applications.
- Long run jobs using acrylic (water based) varnishes and short run jobs using U.V. varnishes.
- We recommend using in conjunction with good quality paper .

Advantages:

- Easy to cut and peel
- Easy to clean
- Minimal ink build-up
- Highest dimensional stability
- No "orange peel" effect on the coating
- Reusable for multiple long runs without registration problems thanks to the polyester base

Packaging:

Available in all machine sizes , standard packages of 10 pieces

For standard widths of the rolls, please check to the Standard Size List
